

A Smart Way to Treat Your Symptoms

With the Zerigo Health Solution, you can treat your eczema or psoriasis with smart light therapy in the comfort of your own home.

FDA-Cleared¹ Smart Light Therapy Device:

Delivers safe, effective, professional-grade UVB phototherapy treatment for professional-grade results.

PreciZeDose Technology:

Delivers precision UVB phototherapy according to your prescription.

ZerigoCare™Guide Support:

One-on-one live expert coaching for every step of your healthy skin journey—as much or as little as you need. Real support from real people (bots not allowed).

Zerigo Smart App:

Track results, view your progress, receive treatment reminders and personal skin-health management strategies.

What is Smart Light Therapy

Smart UVB Light Therapy is the next generation in light therapy treatment for chronic skin conditions.

Our Smart Light Therapy uses LEDs to deliver precise, prescription-controlled doses of light to the affected areas of our skin for safe, effective, targeted treatment exactly where you need it.

Smart Light Therapy is a standard-of-care treatment for psoriasis that can deliver the same results as in-office phototherapy. While it's effective on its own, it can also be combined with other types of treatment, like oral medications and topical creams.

Zerigo's Smart Light Therapy is:

Targeted: The Zerigo device protects your skin from unnecessary exposure by only delivering therapeutically beneficial wavelengths of light where you need it and none where you don't.

Personalized: The Zerigo device and app adjust your dosing based on how your unique skin responds to treatment, helping ensure you get the best results as quickly as possible.

Controlled: Each dose is administered with the press of a single button—just push and treat!

Connected: The Zerigo app connects and syncs with your Zerigo device's data, enabling you and your physician to see your progress.

(1) The Zerigo Solution received FDA clearance on May 23, 2017. The Zerigo Health Phototherapy System is an Ultraviolet Light Emitting Medical Device. It is intended for use in localized phototherapeutic treatment of dermatologic conditions such as psoriasis, vitiligo, atopic dermatitis (eczema), seborrheic dermatitis, and leukoderma on all skin types (I-VI). The Zerigo Health Solution is not intended to provide medical advice or be a substitution for appropriate or necessary health care treatment.
