

Natural Light Therapy for Psoriasis, Vitiligo and Eczema

Phototherapy (light therapy) is a safe, proven treatment for millions of Americans with chronic skin conditions like psoriasis, vitiligo and eczema. But getting treated in your doctor's office is time consuming and inconvenient. Legacy home devices are ineffective and hard to use.

Zerigo Health is different. The Zerigo Health Solution is different by combining smart technology with unmatched support. No more trips to the clinic or doctor's office. Instead, safely and easily treat your skin at home or on the go using a smartphone and our handheld device. Just push a single button to deliver the precise dose of light your doctor prescribed.

With Zerigo, you can monitor your own progress. It's the only solution that provides ongoing coaching and support. That makes it easy to stick with your treatment longer—for results you can see.

Getting started

Talk to your doctor to learn if Zerigo is right for you.

If your doctor has already prescribed Zerigo, a Zerigo Health representative will call you to process your prescription within 2 business days.

To learn more, visit www.zerigohealth.com or call (877) 738-6041.

How Zerigo Works

Zerigo uses narrowband ultraviolet B (NB-UVB) light that is proven safe and effective for treating many skin conditions. Natural light therapy can be combined with other treatments to improve results.

About Zerigo Health

Zerigo Health (formerly Clarify Medical) offers the only comprehensive home solution that seamlessly connects patients and providers to deliver optimal dermatological outcomes. Zerigo's precision solution remotely treats and monitors patients with chronic skin conditions using narrowband ultraviolet B (NB-UVB) phototherapy, a proven standard-of-care treatment. Patients benefit from the unique combination of advanced technology with personal coaching and support throughout their treatment journey, which results in documented increases in treatment adherence and patient satisfaction. Continuous Support

Our team of CarePartners answers all your questions, assists with insurance coverage, and offers technical and treatment support any time you need it—via phone, email or chat.

Who Can Benefit From Zerigo?

Zerigo is safe for children and adults, including pregnant women. It is effective for many skin conditions, including psoriasis, vitiligo and eczema.

PSORIASIS

Zerigo is an efficient option for people with psoriasis who need more than topical treatments, who wish to avoid systemic medications, or whose current treatment plan is not yielding adequate results.

Zerigo is ideal for people with targeted disease. Plaques on the face, trunk, arms and legs are easier to treat than those on the scalp, hands or feet.

VITILIGO

Narrowband UVB is considered the gold standard for treating vitiligo, stimulating melanocytes (skin cells that contain pigment) to help re-pigment the skin. The therapy is most effective when started at a younger age.

ECZEMA

Zerigo provides rapid treatment for many people with eczema and may help people avoid the long-term use of steroids.
